

Dear Woodside HOA Residents,

We are fortunate to be working with your community to provide repairs to your sidewalks. These repairs are scheduled to begin on Wednesday, May 1st through May 24th (tentatively). Our technicians will arrive onsite between 8:00 – 9:00 AM on business days.

We will start near building 2200 on Woodside Ln and work our way through the first phase of the community (yellow portion of the map) before moving towards the second phase (pink portion of the map). The third phase (green portion of the map) is currently on hold while PG&E is completing repairs and will be scheduled after May.

Attached you will find both a map of your property for reference to the information above and a list of locations where vehicles will need to be moved for a repair in that area to be completed. Further communication will be provided to you as we progress.

We look forward to ensuring that your sidewalks are safe and trip-hazard-free. We appreciate your anticipated cooperation in this effort!

If you have any questions about Precision Concrete Cutting or our repair process, please do not hesitate to contact me or visit our website, provided below.

Best,

Tara Poole
